

Task 7: Business Insights & Recommendations

E-Commerce Sales Analytics - based on the completed EDA and Power BI dashboard

Total Net Sales	Total Orders	Total Quantity	AOV
Rs. 11.91 lakh	2,482	5,335	Rs. 480.02

Key Business Insights

- 1. Electronics dominates sales:** Electronics generated about 75.1% of total net sales, making it the strongest category.
- 2. Top products are concentrated:** The five highest-selling products were all Electronics, led by Smartphone and Monitor.
- 3. Monthly sales fluctuate:** July recorded the highest monthly sales (about Rs. 1.28 lakh), while August was the lowest (about Rs. 0.84 lakh).
- 4. Order quality needs attention:** 70.9% of orders were Delivered, but Cancelled + Returned orders together were about 11.2%.
- 5. Digital payments lead:** Credit Card and UPI together accounted for about 63.2% of orders.

Data-Driven Recommendations

- 1. Prioritize Electronics:** Maintain stronger inventory and targeted promotions for high-performing Electronics products.
- 2. Reduce cancellations and returns:** Analyze the main causes and improve product information, quality checks, and delivery processes.
- 3. Use sales seasonality:** Plan stock and campaigns around high-demand months and investigate the August sales dip.

Conclusion: The business is strongly driven by Electronics and digital payments, while sales seasonality and order cancellations/returns are the main areas for improvement.
